## Pneumatic Retinopexy PostOp Instructions

You will be given an antibiotic and anti-inflammatory eye drop to use after your procedure. Please use each drop 3 times a day for 3 days.

You may use Tylenol as needed for any discomfort you may experience.

No flying or driving to high altitudes until instructed otherwise. Please maintain only light activity until after your first post-operative visit. The doctor will discuss your individual positioning and restrictions after your procedure.

Please call our office with any new concerns.
